## RECOVER LOST DATA AND UNDELETE DELETED FILES WITH SOFTAMBULANCE UNERASER

SoftAmbulance Uneraser makes it easy to undelete deleted files. The data recovery tool undeletes files from healthy, corrupted and even inaccessible hard drives, memory cards and USB drives and memory sticks formatted with any revision of FAT or NTFS file system. SoftAmbulance Uneraser uses sophisticated proprietary technologies to make data recovery more reliable and easier to do for anyone using the recovery tool.

### Recover Data from FAT and NTFS Drives

There are multiple revisions of FAT and NTFS file systems used in different versions of Windows. SoftAmbulance Uneraser supports every version and every revision of FAT and NTFS, making it possible to recover deleted files and data lost due to a disk or file system corruption on any version of Windows from Windows 95 to Vista and the latest Windows 2008 Server.

### Recover Files from Severely Damaged and Inaccessible Disks with Deep Search

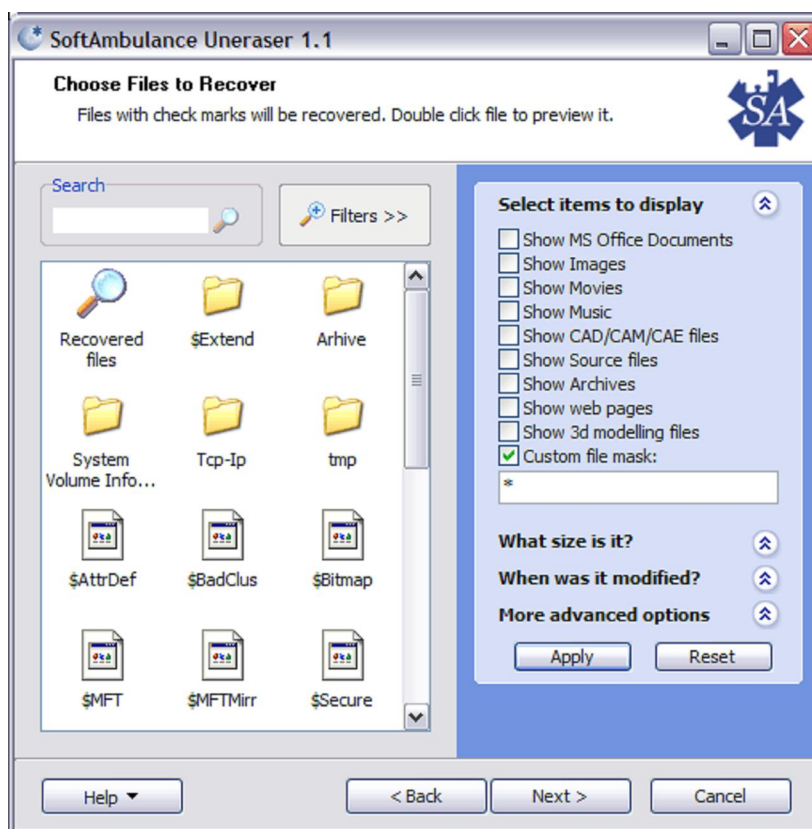

Unlike many free undelete and data recovery tools, SoftAmbulance Uneraser undeletes files and recovers data from healthy, corrupted, inaccessible and badly damaged disks just as well. The unique Deep Search technology, a result of years of research, scans the entire surface of a hard drive to locate every file that can still be recovered – no matter how bad the damage is! Deep Search supports more than 150 types of files such as office documents, ZIP and RAR archives, audio and video files, digital pictures and RAW files produced by digital SLR cameras.

#### Main Features

Undeletes deleted files

Repairs variety of file formats

Demo version can preview recovered files

### Safely Preview Files before Recovery

If you have more than one copy of a file stored on the disk being recovered, you only need the latest version to recover. Deleted files can overlap, causing corrupted files worth hours of work. SoftAmbulance Uneraser makes it easy to choose just the right file by offering pre-recovery preview even in its free edition. Make sure that SoftAmbulance Uneraser can do what we claim! Download your own copy, run a disk scan and preview all recoverable files without saving them onto the damaged disk!

### System Requirements
